Purpose-built with finance understanding, Auditoria's SmartBots provide a system of engagement, utilizing the email function and systems of record to automate finance functions.

NLP-DRIVEN AI AND ML INTELLIGENT PROCESS AUTOMATION

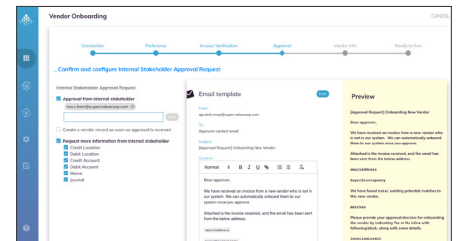

Purpose-built for finance with NLP, AI and ML, Auditoria SmartBots integrate with systems of record and email boxes to act as a system of engagement. Adoption and execution are accelerated with English language, terminology-driven configuration, and intent detection for finance processes. Next-generation machine learning and artificial intelligence built technology delivers a 10x multiplier in accuracy and productivity.

NATIVE-CERTIFIED INTEGRATION INTO EXISTING APPLICATIONS

Extend application investments with secure, cloud-native APIs to seamlessly integrate into popular systems of record. Existing collaboration tools from Microsoft 365 and Google Workspace (G Suite) are fully supported, ensuring private, secure, and trusted communications between organizations and their customers and vendors.

BUILT-IN, STATE-OF-THE-ART SECURITY AND PRIVACY

Auditoria delivers the industry's most robust information security and privacy coverage for vendor and customer management workflows. With SOC2 Type 2 compliance, comprehensive access control, end-to-end encryption for data at rest/data in motion, threat protection, vulnerability management, and breach prevention, Auditoria brings peace of mind and assurance that financial data is safe and protected at all times.
